Our Philosophy

We believe that 'play' is an important tool through which a child learns about the environment.

We strive to create an enriched environment, one which a child can grow emotionally, socially, cognitively, and physically.

We encourage the development and appreciation of individuality while learning to be a part of a group.

We stimulate the children's sense of responsibility and teach appropriate social behaviour.

We encourage and respect diverse nature of humanity.

We strive to provide an environment that is safe and healthy for all.

We believe that all children regardless of race, religion, mental or physical ability, are to be valued as individual persons who have the right to developmentally appropriate and diverse programming in order to develop to their fullest potential.
